DiaDent

Absorbent Paper Points

CE 0197

Purpose of use

An absorbent paper points is an endodontic paper point that is used during the endodontic therapy to dry, or remove any foreign materials from the root canal of a tooth.

Directions for use

There are two stages to remove the moisture, blood and other foreign substance from the root canal. A dental professional has to follow steps to fill the root canal.

1. Before the stage of root canal filling with the Gutta Percha Points, the absorbent paper points should be checked the length and size to match the shaped root canal. An absorbent paper points should be selected to be fit to apex of root canal.
2. The selected paper points is inserted into the root canal to remove the blood or foreign substance before root canal filling permanently with Gutta Percha Points

   This procedure is the most fundamental method. However, a dental professional may consider using more Absorbent Paper points to perform the procedure in a different way based on the patient's symptoms.

◈ Absorbent Paper Points are for a single use. Do not re-use them.
