MultiMatch™ Flow

Chameleon Antimicrobial Composite

Protects. Adapts. Lasts.

Experience the next evolution in flowable composite performance. MultiMatch™ Flow Chameleon Composite with BioArmor™ Antimicrobial Protection is formulated to help reduce bacterial load[1,5] and demineralization[2], supporting healthier restorations that stand the test of time.

The nano-hybrid formula offers optimal handling, is self-leveling, and provides excellent adaptation – even in micro-preps and tight margins. With strong physical properties and low shrinkage[3], it delivers reliable performance across everyday restorative procedures.

DENTISTRY TODAY TOP 100 PRODUCTS 2026

DENTISTRY TODAY READERS' CHOICE AWARD 2026 TOP 25 ESTHETIC/RESTORATIVE PRODUCTS

3005230 Shade: Universal
Contains: 2 x 2.3g Syringes, 20 Applicator Tips (20 gauge)

3005235 Applicator Tips
Contains: 100 Applicator Tips (20 gauge)

BioArmor™ Antimicrobial Protection
Lowers bacterial loads[1,5] with proven activity across a broad pH range (2.5–10.4).[6]

Built-In Defense Against Acid Challenges
Reduces demineralization[2]

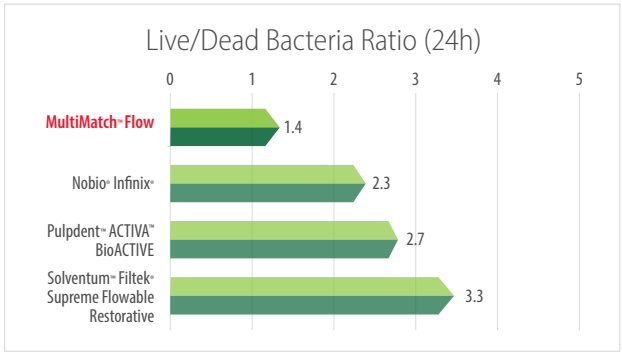

Optimized Handling
Easy-flowing, self-leveling for smooth placement and excellent adaptation

Low Shrinkage + Strong Physical Properties
Helps maintain marginal integrity and long-term durability[3]

EZ-Blend™ Shade Simplicity
One universal shade that blends to match the 16 VITA® classical A1-D4® shades[4]

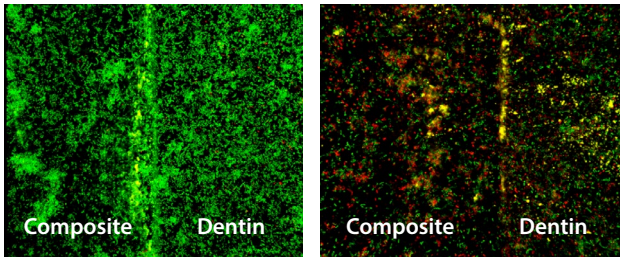

PRO-TIP:
One Solution, Multiple Applications
Cleared for Class I-V restorations, pit and fissure treatments, and orthodontic aligner buttons.

Antimicrobial Protection*

Control composite with no antimicrobial properties

Premier® MultiMatch™ Flow with BioArmor™

Dead bacteria (red) | **Live bacteria** (green)

premierdentalco.com/promise

EZ-Blend™ TECHNOLOGY

Proprietary Shade Technology

And with our proprietary EZ-Blend™ shade technology, a single universal chameleon shade naturally adapts across all 16 VITA classical A1-D4® shades.[4]

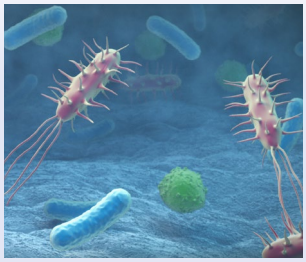

Indications for use

- Direct restorations in all cavity classes (I-V)
- Base / liner under direct restoration
- Veneering of discolored anterior teeth
- Splinting of mobile teeth
- Extended pit and fissure sealing in molars and premolars
- Repair of composite/ceramic veneers
- Retention of thermoplastic aligners

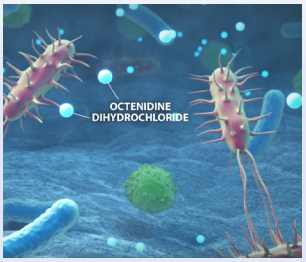

The addition of antimicrobial particles to MultiMatch™ Flow Chameleon Antimicrobial Composite reduces demineralization and the total amount of bacteria at the material surface, which is part of the caries-formation process.

Antimicrobial Protection

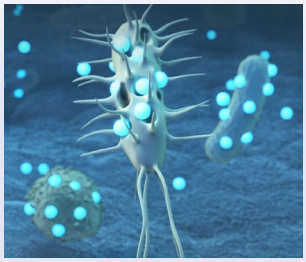

BioArmor™ antimicrobial-infused silica contains Octenidine Dihydrochloride (OCT), an antimicrobial agent that disrupts microbial cell membranes, leading to rapid cell lysis and death. BioArmor™ is effective against a range of pathogenic microorganisms, such as bacteria, fungi and viruses, that make up biofilm. Its broad-spectrum efficacy and long history of safe, effective use make it a trusted technology in dental applications. It helps reduce bacterial load and demineralization.

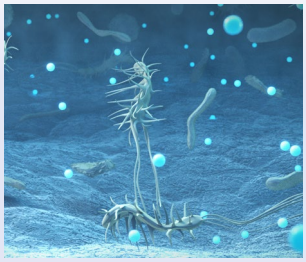

A positively charged component of BioArmor™, Octenidine dihydrochloride (OCT) leaves the composite surface and enters the biofilm.

It penetrates the negatively charged microbial cell membranes disrupting their integrity. This process continues as OCT diffuses through Biofilm.

OCT kills bacteria and critically disrupts fungus and virus, stopping them from growing and multiplying.

This protective process works for the life of the restoration, with proven activity across the broad pH range (2.5 -10.4).

MultiMatch™

Universal Chameleon Restorative Composite

Simplified Shade Matching. Beautiful Results.

MultiMatch™ Universal Chameleon Restorative Composite takes the complexity out of shade selection – covering all VITA® classical A1–D4® shades with just three EZ-Blend™ options – Light, Medium and Dark. Its advanced optical properties deliver a seamless, natural blend that patients notice – or don't notice – for all the right reasons. And you'll appreciate the ease of placement, superior handling, and excellent physical properties.[3] Talk about workflow efficiency![2]

Chameleon Blending Properties
Outstanding shade match[2] & long-lasting color stability[3]

Simplified Shade Selection
3 EZ-Blend™ shades = 16 classic VITA® shades[2]

Exceptional Handling
Easy to place, sculpt, finish & polish[1]

Universal
For all cavity classes, anterior & posterior

Excellent Strength & Durability
Resists chipping, fractures & wear[4]

EZ-Blend™ TECHNOLOGY

EZ-Blend's three chameleon shades deliver a more genuine, effortless result versus a single-shade composite.

Bond-PR™

Universal Adhesive

NEW!

You will appreciate the performance and reliability of Bond-PR™ universal adhesive. This versatile solution delivers high-strength adhesion across all restorative substrates[1-4] with the flexibility to work seamlessly in any etching technique.[2-5]

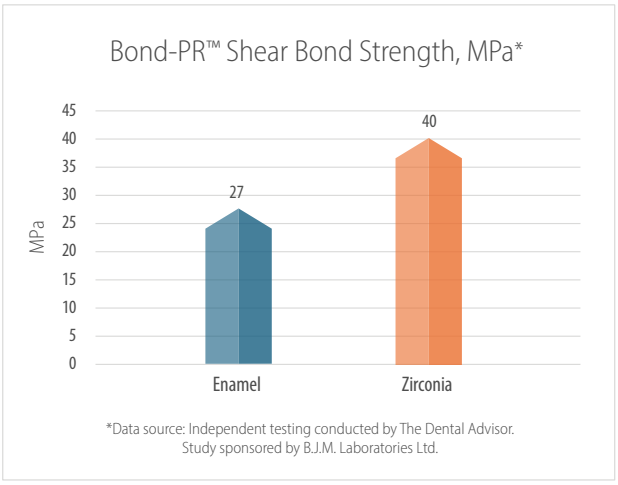

Its 10-MDP-enhanced formulation ensures durable bonding to zirconia[1-3] and ceramics – no separate primers required.[1-5]

The result is a streamlined workflow, with a formulation designed to help reduce or eliminate post-operative sensitivity and deliver predictable outcomes you can rely on.

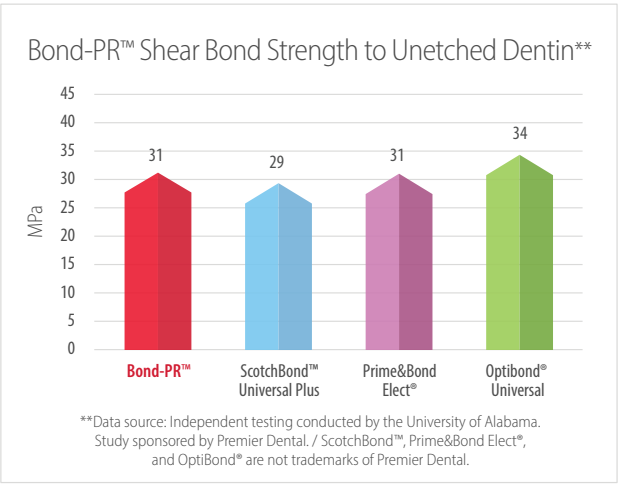

3005250 Bond-PR™ Standard Pack
Contains: 1 x 5 ml bottle

3005255 Bond-PR™ Value Pack
Contains: 3 x 5 ml bottles

**Data source: Independent testing conducted by the University of Alabama. Study sponsored by Premier Dental. / ScotchBond™, Prime&Bond Elect®, and OptiBond® are not trademarks of Premier Dental.

Contains 10-MDP
For bonding to zirconia[1] and hydroxyapatite in enamel and dentin.[1,7]

Universal Compatibility
Optimized for use with all restorative substrates.[1–5]

Streamlined Workflow
Eliminates need for separate primers or activators.[1–5]

Reliable Performance
Delivers high, dependable bond strength you can rely on.[1–5]

Reduced Sensitivity
Lowers post-operative sensitivity in self-etch mode.[6]

One Product, All Techniques
Compatible with self-, selective-, and total-etch.[2–5]

Lumira™

LED Curing Light

NEW!

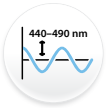

Technology Inspires Clinical Confidence.

Designed for today's clinicians, the Lumira™ LED curing light delivers consistent performance and durability. Lumira's lightweight, all-metal construction withstands the rigors of daily dental use while reducing hand fatigue. Its innovative low-profile head rotates 360° for effortless access and optimal illumination throughout the oral cavity. Lumira combines advanced optical technology with clinical versatility, offering a broad wavelength range to effectively polymerize CQ products, a maximum output of up to 3000 mW/cm^2 for rapid curing, and a high-intensity collimated beam for uniform light distribution and increased depth of cure.

With seven curing modes – including Normal, High, Turbo, Ortho, Soft, Pulse, and Check (Transillumination) – the Lumira LED curing light provides a comprehensive solution for delivering predictable, reliable cures, even in challenging deep restorations.

Wave Range

- *440–490 nm*
- *Polymerizes CQ products*

Intensity

- *Max irradiance 3000 (mW/cm^2)*
- *Matches premium brands*

Collimated Beam

- *Less light loss*[1]
- *Reliable depth of cure*

7 Clinical Modes

- *Align with restorative workflows*
- *Normal, High, Turbo, Ortho, Soft, Pulse & Check*

Streamlined Design

- *Durable all metal design*
- *Ergonomic & lightweight (108g)*

StackFlow™

Injectable Light-Cured Composite

NEW!

Stacks when you want.
Flows when you need.

StackFlow™ is a versatile flowable composite with highly thixotropic behavior that offers clinicians the best of both worlds: control when you want it and adaptability when you need it.

A proprietary hydrophobic silane surface-treatment applied to nano fillers improves dispersion and strengthens the resin–filler interface, supporting excellent mechanical integrity and smooth, controlled handling.

StackFlow places precisely and polishes to a natural, long-lasting gloss. The result is a streamlined workflow and durable, aesthetic restorations across a wide range of indications.

Versatile Flowable Composite
Suitable for a wide range of indications

Thixotropic Handling
Holds its shape when dispensed yet flows on demand for efficient adaptation

Hydrophobic Silane Surface Treatment
Promotes uniform filler dispersion for enhanced strength & predictable handling

Strength Equivalent to a Conventional Composite
Delivers durability without sacrificing ease of placement

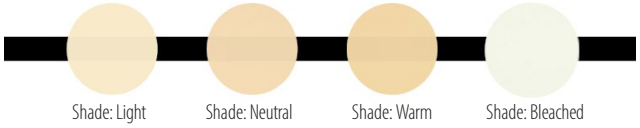

Zero-Bubble Syringe Tip
Ensures smooth placement while helping minimize bubbles and oozing

StackFlow™ Standard Pack
Contains: 2 x 2.5g Syringes, 20 Applicator Tips

new!

UniClean™

Universal Restorative Cleaner

NEW!

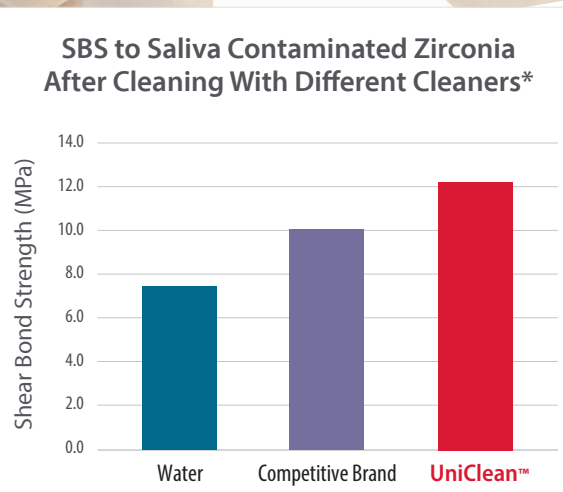

UniClean™ effectively removes salivary contamination from the intaglio surface after try-in – a critical step for achieving strong, long-lasting bonds. Its advanced formulation binds salivary proteins and creates a rinseable precipitate, ensuring a thoroughly clean surface.

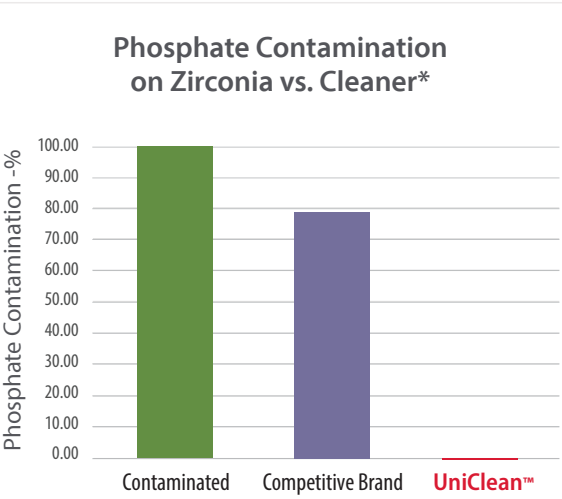

- ✓Advanced formulation – *binds salivary proteins ensuring a thoroughly clean surface*
- ✓Compatible with all restorative materials: zirconia, glass ceramics, gold, metal, & composite
- ✓Cleaning with UniClean™ promotes strong, reliable bonding performance – especially with zirconia.
- ✓Fast 20-second application
- ✓Ready to go from the bottle – *no shaking required*
- ✓Optimized viscosity for accurate placement & easy handling
- ✓Orange tint ensures visibility for coverage and thorough rinsing

Orange tint ensures visibility!

Traxodent® Gel AlCl

25% Aluminum Chloride Hemostatic System

NEW!

Clear Control. Proven Performance.

- ✓25% aluminum chloride for effective hemostasis & fluid control
- ✓Innovative formula boosts gel penetration for faster, more effective results
- ✓Excellent visibility during placement & rinse
- ✓Syringe delivery for easy, accurate application

9007101 Traxodent® Gel AlCl
Contents: 30cc (30mL) Filled Bulk Syringe, 20 Brush Tips, 20 x 1.2ml Syringes, 20 x 1.2ml Syringe Caps, Docking Port

9007105 Traxodent® Gel Brush Tips
Contents: 100 Brush Tips

Traxodent® Gel FS

20% Ferric Sulfate Hemostatic System

NEW!

Targeted Hemostasis with the Strength of Ferric Sulfate

- ✓20% ferric sulfate gel with optimized handling
- ✓Rapid hemostasis & sulcular fluid control for procedural efficiency
- ✓Excellent visibility during placement & rinse
- ✓Syringe delivery for easy, accurate application

9007106 Traxodent® Gel FS
Contents: 30cc (30mL) Filled Bulk Syringe, 20 Brush Tips, 20 x 1.2ml Syringes, 20 x 1.2ml Syringe Caps, Docking Port

VeneerNow™

Injectable Matrix System

Simplify your anterior composite restorations!

Elevate your dental practice and improve your workflows with the VeneerNow™ Injectable Matrix System – your solution for quickly creating chair-side attractive, natural-looking composite veneers and anterior restorations. Designed for ease of use, it enables composite injection with minimal clean-up.

VeneerNow also works with packable composite, offering versatility. This essential addition to your operatory toolkit makes anterior restorations fast with predictable results.

VeneerNow™ Fast, Predictable Results!

Full anatomical design
Replicates natural tooth shape for superior results

Side wings
Enhance stability & minimize interproximal clean-up

Closed system matrix
Provides a void-free smooth composite layer for easier finishing and polishing

Natural cervical line
For a precise anatomical emergence profile

Injection stalk for flowable composite
Provides easy injection for optimal placement

Versatile
Use with flowable or packable composite

Hemodent®

Buffered Aluminum Chloride Hemostatic Solution

For over 50 years, the world's most sought after hemostatic dental product.

- ✓ Fast & effective
- ✓ Unique formulation
- ✓ Wide range of uses
- ✓ 3-Year shelf life

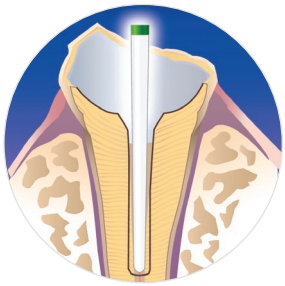

Hemodent® effectively stops minor gingival bleeding. It contains no epinephrine to help avoid cardiac reactions. Hemodent is stable and offers a long shelf life.

Recommended to arrest bleeding during tooth crown preparations, before dental impression taking, placing fillings, dental cement bases, or temporary cementing inlays or tooth crowns; also after minor dental surgery, curettage, gingivectomies, gingivoplastys and deep scaling.

Cure-Thru® IntegraPost®

Light-transmitting Zirconia Glass Fiber Post

- ✓ Safe and Simple to Use – *Composite Zirconia Glass Fiber composition won't fracture root and provides easy non-traumatic removal.*
- ✓ Aesthetic – *White color of post guarantees no grey shadow or show through.*
- ✓ Strong and Flexible – *Elastic modulus and flexural strength more like tooth structure allowing the post to respond like the tooth to traumatic stresses. (E-modulus 52 GPa/Flexural Strength 1650 MPa)*
- ✓ Factory Silanated for Secure Adhesion – *Post is chemically treated to bond with both resin cement and composite core build-up material.*
- ✓ Light Transmitting – *Photo curing through the post assures complete polymerization of cement around and down the post length.*
- ✓ Four Color Coded Post Sizes – *Multiple sizes for easy fit in all teeth and canal space. Color coding make size selection easy.*
- ✓ Tapered Tip Design – *Parallel body with slightly tapered tip conforms to apical root anatomy for safe and effective adaptation of post.*

Premier® Universal Primer

Zirconia and Glass Ceramics, Metal and Composite Primer

- ✓ Dual coupling agents works with all substrates
- ✓ Easy to use – just apply, wait 60 seconds, and dry
- ✓ No pretreatment of restoration required
- ✓ Can be used with adhesive and self-adhesive resin cement to achieve maximum bond strength

3001568	5ml bottle

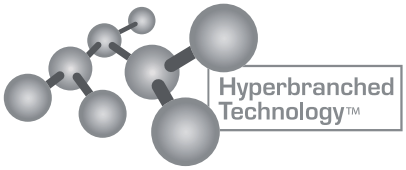

Not available in Canada.

CompCore™ AF

Dual-Cure Composite Core Build-up Material

Faster & stronger
A better core experience!

Build cores with confidence! CompCore™ AF resin composite is easy to place, shape and finish. The composite cuts like dentin with excellent visibility on radiographs while its superior mechanical properties and fluoride release deliver long-term clinical success.

Proprietary Polymer Strengthener

Outstanding Handling

Optional Dual-Cure

Superior Mechanical Properties

Minimum Shrinkage of < 2.0%

CompCore™ AF SyringeMix STACK:
9g Automix Syringes/Dual-Cure

3001512 SyringeMix STACK / Shade White
3001513 SyringeMix STACK / Shade A3
3001514 SyringeMix STACK / Shade Blue

Contains: two 9g automix syringes, 15 mix tips, 15 standard and 10 extra-fine intraoral tips.

Refill Kit

3001432 Shade White
3001433 Shade A3

Contains: 50g cartridge of CompCore AF Dual-Cure, 25 mix tips, 25 intraoral syringe tips

Accessories

3001418 SyringeMix Mix-Tips & Intraoral Tips (35 each)
3001468 SyringeMix Extra-Fine Intraoral Tips (50)
3001417 Cartridge Mix-Tips & Intraoral Tips (35 each)

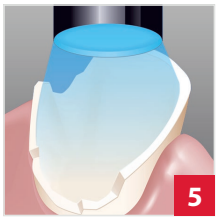

Bonding Agent

(use only bonding agents compatible with dual-cure composites, such as IntegraBond™)

1. Clean and dry prepared tooth surface.
2. Apply 37% phosphoric acid to the cavosurface for 10 to 15 seconds.
3. Rinse and dry cavo surface, do not desiccate the tooth.
4. Apply first coat of IntegraBond™ on prepared cavosurface. Allow to sit for 15 seconds, and then air dry. Apply 2 to 3 more coats; without waiting, dry again after last application.
5. Light-cure for 20 seconds.

Core Build-up

1. Bleed syringe. Assemble intraoral tip to mix-tip, attach to syringe and bleed tip.
2. Place intraoral tip into the base of the prepared tooth and dispense. Let material rise around the tip while withdrawing to eliminate air bubbles.
3. Light-cure for 30 seconds. If the core is larger than 8mm, light-cure for at least an additional 10 seconds.
4. Check for complete hardness. The preparation can be finished immediately with a Two Striper® bur. Alternately, the core can be chemical-cured, final set-time is 4.5 minutes.

NexTemp®

Non-Eugenol Temporary Resin Cement

Your go-to temporary cement
Stays Put, Removes Easily

NexTemp is the reliable temporary cement you can count on. That's because NexTemp creates an excellent marginal seal with firm retention to help prevent premature dislodgment or microleakage.

What's more, NexTemp is the only eugenol-free resin cement containing potassium nitrate, chlorhexidine and fluoride – which studies show help mitigate post-op sensitivity.[16]

- **Temporary Restorations Stay Put**
- **Eugenol-Free**
- **Proprietary Formula**
- **Affordably Priced**

Greater Retention, Less Cement!
Just dispense a small bead of cement around the inside margin.

> *"This is such a superior product to all the other temp cements we have tried over the years."*
>
> – Peter Schott, DMD
> Middletown, RI

Premier® NexTemp® Temporary Cement is easy to use

1. Dry and isolate the prepared tooth.

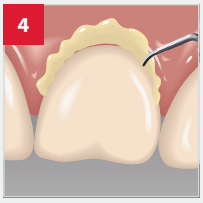

2. Bleed the syringe. Mount a new automix dispensing tip and bleed the syringe again.

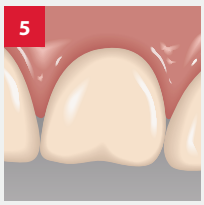

3. Dispense a small bead of cement around the inside margin.

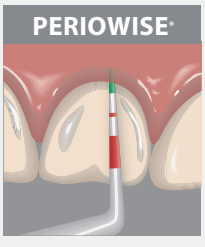

4. Seat the temporary and hold in place. In approximately 2 minutes, excess cement reaches a distinct gel phase and can be removed safely.

5. Final set occurs between 4-5 minutes after seating of temporary restoration.†

PERIOWISE®

Use a PerioWise® Periodontal Probe for post-treatment periodontal evaluation.

*An independent non-profit dental education and product testing foundation, December 2006 & 2007 / †Final set time is determined intraorally. Ambient set times vary and are not representative of clinical conditions. / 16. Jalalian E, Meraji N, Miraei M. A comparison of the efficacy of potassium nitrate and Gluma desensitizer in the reduction of hypersensitivity in teeth with full-crown preparations. J Contemp Dent Pract. 2009 Jan 1;10(1):66-73.

Premier® Implant Cement™ *Plus*

The ultimate solution for implant crown cementation.

- ✓ Secure retention – *for long-lasting hold*
- ✓ Retrievable – *without damage to the crown, abutment or implant*
- ✓ Easy to use – *no etch, primers or adhesive required*
- ✓ Unsurpassed radiopacity* – *excellent visibility on radiographs*

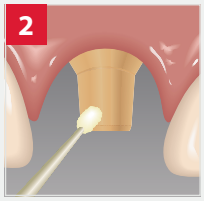

Unsurpassed Radiopacity

Premier® Implant Cement™ is easy to use

Check the fit. Complete all finishing procedures.

Rinse and dry abutment and interior of restoration.

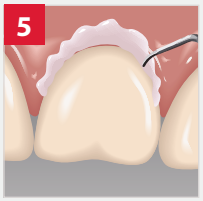

Bleed syringe. Mount new automix tip and then bleed the syringe again. This assures proper flow of base and catalyst.

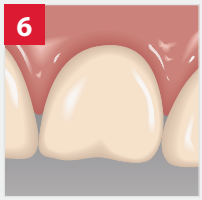

Using a microbrush, place a thin film of cement along the inside wall of the cervical third, making sure to completely coat the margin with cement. You have 1.5 minutes of working time at room temperature.

Excess cement should be avoided. Too much cement can cause future restoration retrieval to be difficult to impossible.*

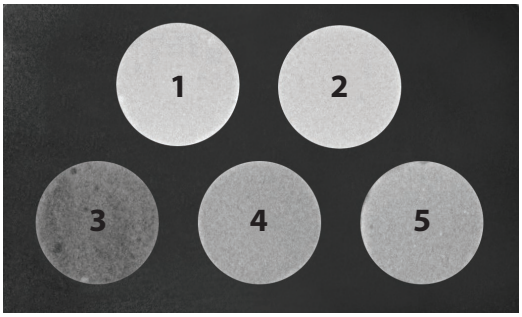

Firmly seat the crown and hold in place until initial set (gel phase) occurs in 2–2.5 minutes. Safely remove excess cement before final set. It is imperative to remove all excess cement.

Final cement is 4 - 5 minutes, intraorally.

**Any excess cement (regardless of chemical make-up or brand) that remains in the sulcus around an implant could lead to peri-mucositis, peri-implantitis or implant failure if not removed immediately.*

Premier Implant Cement *Plus* offers unsurpassed radiopacity* with excellent visibility on radiographs.

Triple Tray®

Proven Accurate in Over 185 Million Impressions

- ✓ Three techniques in one
  – *Saves time, money and materials.*
- ✓ Adaptable, ultra-thin webbing
  – *Provides accurate bite registration and low water sorption[17] reducing the possibility of distortion*
- ✓ Disposable – *No cleaning involved, aseptic*
- ✓ Seven configurations – *Designed to address all clinical cases*

Wide Body Posterior Triple Tray
THE DENTAL ADVISOR ++++½

Premier X5 Sectional Matrix System®

Reliability. Convenience. Value.

A superior sectional matrix system is here.

Premier X5 – an innovative, complete, high-quality, 5 component system designed to achieve accurate Class 2 composite restorations.

9061150 X5 Intro Kit

Contains:

(1) Matrix Pin Holder
(1) Matrix Ring Forceps
(10) Matrix Rings (gray)

(25) each	Wedges	Matrices
	Small (yellow)	3.5mm
	Medium (green)	4.5mm
	Large (blue)	5.5mm
		6.5mm

9061150 X5 Essential Kit

Contains:

(10) Matrix Rings (gray)

(25) each	Wedges	Matrices
	Small (yellow)	3.5mm
	Medium (green)	4.5mm
	Large (blue)	5.5mm
		6.5mm

Reorder

9061190 X5 Matrix Ring (35)

catapult vote of confidence TRUSTED BY DENTAL EXPERTS

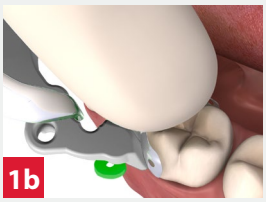

Strong | **Contouring/Contacts** | **Compatible** | **Easy** | **Priced Right**

There's never been a better time to make the switch to X5 and save without compromising quality results.

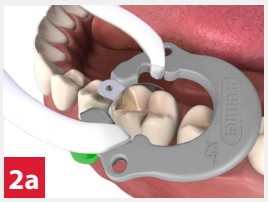

Placement of Matrix. Select matrix based on the approximate occlusogingival height. Place prongs of Pin-Holder through corresponding holes in the matrix with the gold side visible to easily disengage the instrument once the matrix is in place.

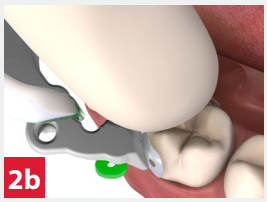

When placing the matrix before the wedge, place a finger at the occlusal aspect of the matrix to hold it in place & prevent it from dislodging, or use Pin-Holder to secure matrix, proceed with wedge placement.

Fold the matrix tab towards you so you can insert the matrix apically into the gingival crevice & adjust matrix to the proper height to obtain ideal benefit from the contour of matrix.

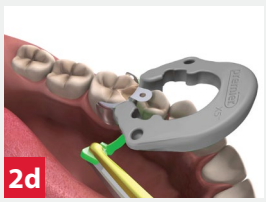

Placement of Premier X5™ Ring. Use the ring forceps to grasp and slightly expand the ring. Carefully place the ring as low as possible with the tines of the ring close to the gingival margin and straddling the wedge(s).

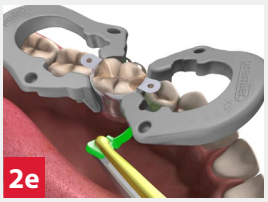

When you are ready to release the ring from the Ring Forceps, place your finger and press down on the matrix tab to prevent any unwanted movement.

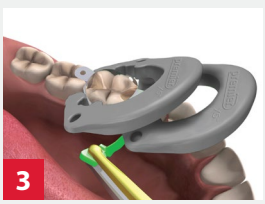

Premier X5™ Ring in the ideal position from a buccal view.

Dual-Wedging: The Premier X5™ system allows for the insertion of a second wedge, to prevent any leakage, to be placed from the opposite side without removing the ring. The second wedge should be inserted underneath the first wedge.

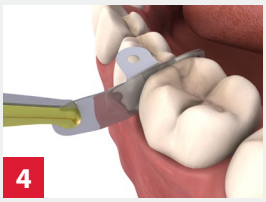

Mesial & Distal Ring Placement: The ring may be placed mesially and/or distally for better access such as the case with MOD restoration.

Dual-Mesial Ring Placement: Premier X5™ ring may be stacked over each other for better access such as the case with MOD restoration.

Perform Restoration: Proceed to fill entire cavity preparation with desired composite material.

Premier X5™ Removal: Remove ring using Ring Forceps, remove wedge(s) using Pin-Holder, separate matrix from composite using a thin bladed instrument by pushing the instrument into the embrasure. Fold matrix wings backwards and cure composite again from buccal and lingual surfaces. Remove matrix with Pin-Holder; grip one of the matrix holes with the Pin-Holder and gently wiggle the matrix out.

If needed, you may use another Pin-Holder on the "opposite" side of the matrix and move the matrix back and forth, or upward, until loose.

HIGH QUALITY IMPLANT MAINTENANCE

NEW!

Spot-On™ Etch

37% Phosphoric Etch Gel

Spot-On™ Etch is a 37% high viscosity phosphoric etch gel for all your routine and selective-etch procedures. It's designed with enhanced viscosity that will prevent it from dripping or slumping. Spot-On Etch easily flows through a small applicator tip, washes off readily and resists drying out.

- ✓ Ideal for routine etching and selective-etch procedures
- ✓ Blue color provides a strong contrast to enamel and dentin
- ✓ No slump formula
- ✓ Easy handling
- ✓ Rinses clean without leaving residue

3001460 Spot-On™ Etch Bulk

One 12g jumbo filled syringe with luer lock adapter

Ten 1.2ml empty syringes

Fifty 1.2ml disposable applicator tips

3001461 Spot-On™ Etch Intro

Five 1.2ml filled syringes

Twenty bent disposable applicator tips

Spot-On™ Etch no-slump viscosity will stay put. Only etch the areas you desire!

Premier® Etch

37% Phosphoric Acid Dentin/ Enamel Etch Gel

Premier® Etch contains phosphoric acid for etching tooth enamel and dentin when preparing surfaces for the application of composites.

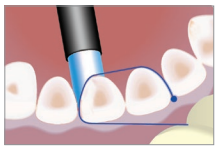

3001422 37% Dentin/Enamel Etch Kit

Contains: one 12g jumbo syringe, with luer lock adapter, ten empty 1.2ml syringes and 50 disposable applicator tips for the ten 1.2ml syringes

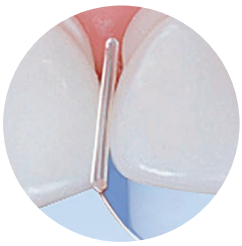

Stop Strip

Anterior Bands with
Integrated Stopper

- ✓ Turns a three-handed procedure into a two-handed one
- ✓ Light-cure Class III and IV restorations with ease

Unique integrated stopper secures the matrix band between adjacent teeth.

9061380	8mm (red) (100)
9061375	10mm (blue) (100)

Sycamore Wood Wedges

The Original Anatomically Carved

- ✓ Round tip easily passes over gingiva
- ✓ Concave sides conform matrix band to tooth's anatomy
- ✓ Square end is easily inserted and removed

Wedge length in mm
(13=13mm)
Mini = 11mm
UT = 13mm

Eight color-coded sizes (400 count)

9061109	Mini (Light Blue)
9061106	UT - Ultra Thin (Orange)
9061100	13XT - Extra Thin (Neutral)
9061101	13T (Green)
9061102	13 (Yellow)
9061103	15 (Blue)
9061104	16 (Red)
9061105	17 (Neutral)
9061108	Assorted (UT, 13, 13T & 15)

Cure-Thru® Clear Cervical Matrices

Transparent Pre-contoured Matrix Forms

- ✓ Flexes to the exact contour of the tooth for dense restorations with excellent marginal integrity
- ✓ Compresses restorative material as you light-cure
- ✓ Helps eliminate air inhibited layer
- ✓ Reduces time to final polish

Actual Size

9061011	Assorted Box - Contains: 275 matrix forms, positioning instrument, gingival retraction instrument

Pre-Contoured Metal Bands

- ✓ Anatomical shape achieves better contact points
- ✓ Ideal for large Class II restorations with incremental curing technique
- ✓ Finished edges ensure patient comfort
- ✓ Measures 0.035mm thickness

9061070 Box of 30

BioGREEN™ Micro-Applicators

Bendable. Economical. Eco-Friendly.

- ✓ Available in regular, fine and super-fine sizes
- ✓ Eco-Friendly
- ✓ Gluten-free & Lint-free brush tips

3005100 Regular (green)

3005101 Fine (blue)

3005102 Super-Fine (yellow)

Contents 100 micro-applicators

ComfortView®

Lip & Cheek Retractor

- ✓ Retracts lips and cheeks for optimal buccal and gingival access
- ✓ Maximum visibility and patient comfort
- ✓ Suitable for use in diagnostic, preventative, therapeutic dental applications, in-office whitening, digital impression scanning and intra-oral photography
- ✓ Autoclavable, latex-free

9061381 Universal ComfortView Lip and Cheek Retractor, 2 per box (white)

9061383 Small ComfortView Lip and Cheek Retractor, 2 per box (blue)

9061382 ComfortView Refill Cushions, 10 per pack
